

### The Surgical Blade Remover

Single use and available sterile in boxes of 50. It can be used within the Operating Room at the point of the procedure to remove the full range of surgical blade shapes from either a No.3 or a No.4 fitment handle.

Protecting staff from sharps injuries during contaminated blade removal. It is also transparent allowing for the count at the end of the procedure before disposing in an appropriate sharps container.

### Skin Graft Blade (SG3)

In stainless steel, with 5cm long cutting edge. Fits a No.3 fitment handle. Sterilised, packed individually, boxed in 20's.

### The Keratin Blade fitting an anastomosis

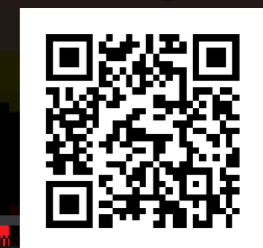

Available in a range of popular blade sizes and is compatible with our No.3 and No.4 surgical handles. The cartridge allows for safe attachment and removal of the blade whilst the sheath can be retracted fully exposing the blades during use.

Long angled, stainless steel blade with short cutting edge. Purpose designed for use in anastomosis. Individually packed, sterilised and boxed in 10's. This blade

# Surgical Blades and Handles by Swann-Morton
